PROJECT : WAKE-UP

SOCIAL REINTEGRATION • TRAINING • HOUSING • EMPLOYMENT • AUTONOMY

Wake up today for a better tomorrow!

- Solidarity
- Training
- Reintegration
- Autonomy
- Dignity for all

What is the WAKE-UP PROJECT ?

It is a project that responds to the 3rd goal of our association, which states that: We want to carry out conditional social actions for vulnerable people, for the social reintegration of those who are marginalized, whose rights and dignity are scorned by the strongest, by injustice and other factors of domination.

1 Helping them wake up and fight back

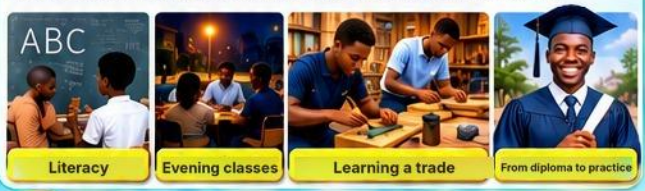

Helping them wake up from their sleep, while reminding them that being a vulnerable, disabled, orphaned or otherwise disadvantaged person does not mean that all the beautiful doors of opportunity in life will open easily without effort; so, whether we are vulnerable or not, we must make an effort, fight back and keep our heads above water;

- Self-confidence
- Make an effort
- Fight back
- Head held high
- Seize opportunities

2 Return to school and learning a trade

For those who have not been able to go far in school, which has left them sidelined in society or in front of certain activities and jobs, we will help them go back to school through literacy classes for some and evening classes for others, and accompany most young people to learn a trade, especially craft trades, even if they already have their academic diploma, BEPC, BAC, BACHELOR'S DEGREE or DOCTORATE, because most young people think that if you have diplomas, it is necessarily an office job that you must wait for.

3 Creation and support of training centers

Hence our objective is to create craft training centers, while supporting those that already exist, as well as employers and individuals who are concerned about having apprentices nowadays, and those who already have their own small training workshop, in order to integrate people who can still learn a trade; school infrastructures will not be left behind either: we will build, equip and renovate those that already exist.

- Create training centers
- Support existing centers
- Support employers and individuals
- Integrate apprentices
- Build, equip and renovate school infrastructures

4 Aid conditional on effort

Our social assistance will sometimes be conditional on the people concerned meeting certain conditions before they deserve it; its conditions are only: to make efforts to learn a trade or resume studies, to have certain levels of competence, to mobilize other people to join our association, to wake up and take charge of one's life. Like the Lizard symbol in our logo: to help those who are already making the effort to climb, but are weak at some point.

MAIN CONDITIONS

- Make an effort (studies or trade)
- Have skills
- Mobilize other people
- Wake up and take charge of your life

5 Handling land and housing problems

In this WAKE-UP project, we will also strongly take into account the land problems that mean that:

A. People are disinherited of their land, which sends some back to the streets, unable to find a roof to sleep under.

B. Others cannot find plots of land to set up their workshop or workplace.

C. Some people cannot even find arable land in their own village to eat and live off its fruits.

Our action:

- Connect members in need with property owners.
- Enable the use of unused land.
- Help them have a place to live, work or farm.
- Reduce land-related conflicts.
- Promote solidarity and good use of spaces.

→ At the same time, there are some who buy large hectares of land that remain unusable for years; empty fences and sometimes unfinished houses that are often unusable; yet their neighbor suffers beside them.

→ We understand: often it is the African fear of one another, of entrusting one's property to others, even to one's loved ones, at the moment one really needs it; they might not return it in time, and this can lead to problems, blackmail and often a matter of justice or witchcraft...

6 Coordination of commercial activities

We will also coordinate the commercial activities of young merchant members: whether they are itinerant, at traffic lights, in train stations, in their stalls or in their shops; subject to these conditions: be 18 years old, have an education level higher than or equal to the B.E.P.C., follow a social and economic training course of a few weeks in one of our nearest centers, which will declare them fit for their commercial activity.

CONDITIONS TO MEET

- Be 18 years old or over
- Education level ≥ B.E.P.C.
- Follow a social and economic training
- Be identified by our supports (T-shirt, vest, badge, logo)

TRUSTED AND IDENTIFIED MERCHANTS!

7 Support in family, social and romantic relationships

We will also intervene in family, social and, above all, romantic relationships that destroy teenagers and young people, who bring into the world children without a future for the most part.

Our support:

- Advice and guidance
- Awareness-raising
- Psychological support
- Values education
- Prevention of early pregnancies
- Restoring family ties

8 Their direct benefits in this project

Their social support is for the total transformation of their lives, to give them social and financial autonomy. Not just to share something to eat with them once when they pass by, but to teach them to fish for themselves and to teach others in turn, to have a conscious generation: as this association is in the process of bringing its members together in a community called 3CJ Conscious Community of Creation James.

AUTONOMY
SOCIAL AND FINANCIAL

- Have a trade or an activity
- Stable income
- A dignified life
- Learn to fish for yourself
- Help others
- Join 3CJ Conscious Community of Creation James

Train, reintegrate, support each other... for a conscious and united generation!
